

HOW *i*CURE WORKS:

wake
the latent virus

Map weak spots and
match
them with tailored
antibodies

1

2

*i*CURE
HIV

3

4

clear
cells carrying HIV
using CAR T cells
(engineered
immune cells)

Clear HIV and
block
relapse by
strengthening
natural immune cells

**Based at The Wistar Institute,
*i*Cure is an NIH-funded consortium
of researchers whose goal is to develop
a personalized strategy to cure HIV.**

*Are you interested in learning more
about research toward an HIV cure?*
